

It has come to my attention that the individual responsible for today's bombing in Palm Springs namedropped our communities in their suicide note. Though they struggled with personal grief and mental health issues, their act of terrorism was unjustifiable, incoherent, immoral, and disgusting.

The philosophy we represent is explicitly one of non-violence. We believe it is up to each individual to make their own reproductive decisions.

We hope that the Palm Springs American Reproductive Center can rebuild and resume operations.
